# Evaporator Fan Replacement For Hussman, Hill & Kysor

**Stock No. 9207F2, 9208F2**

Cast iron bearing and housing for long life and reliability

High capacity oil reservoir continuously supplies cooled, filtered oil thru the bearing.

Electronic control board

Spiral grooved shaft is the heart of the positive pumping system, assuring thick film lubrication for extended bearing life.

*"The iMotor refrigeration motor uses less wattage to achieve the same airflow as a shaded pole motor, so it produces less heat. Fewer BTU's in the system means less work and wear for the compressor for even greater savings."*
